

## Evaluation of Pregnant Patient at Risk for TB

understanding **Author:** Heartland National Tuberculosis Center

**Publication Date:** December 2010

**Country of Origin:** United States

**Format:** Fact Sheet

**Physical Description:** 1p.: col.

**Language:** English

### Abstract:

This fact sheet is a flow chart that provides guidance for the evaluation of pregnant patients at risk for TB. It illustrates the flow of management for asymptomatic and symptomatic individuals, including diagnostic tests, when to initiate therapy, when to delay or stop therapy, and when to seek consultation from a TB expert
